Notable features:

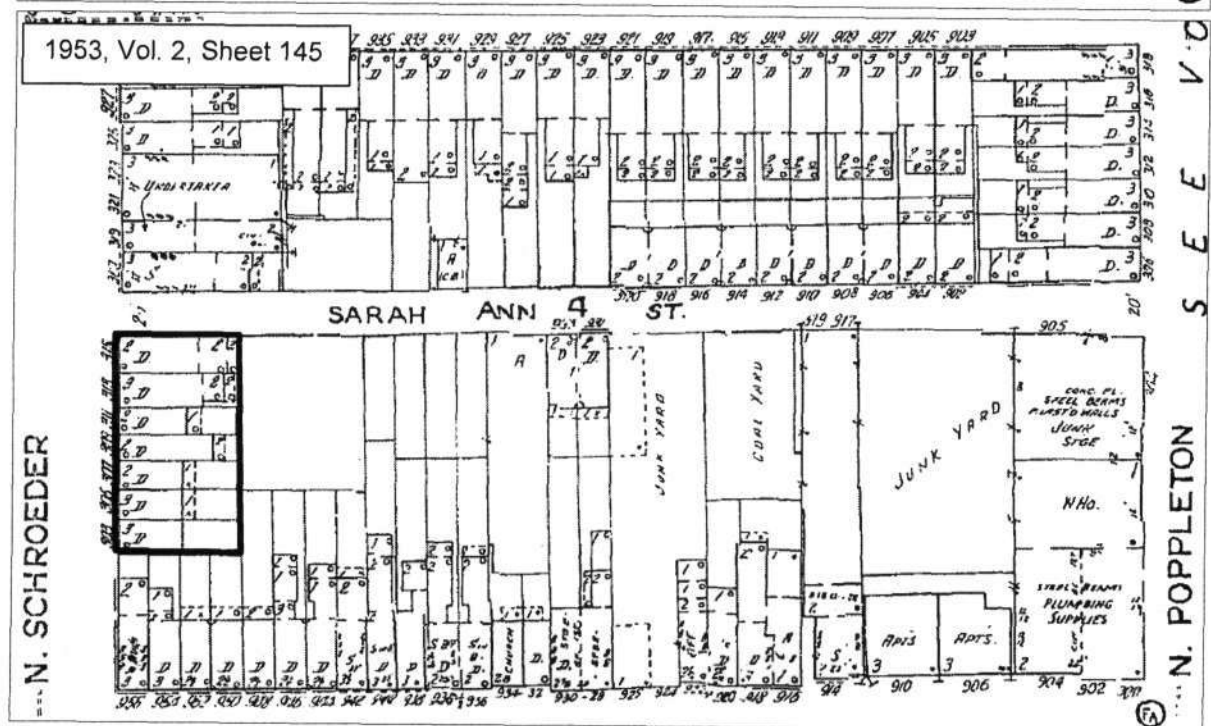

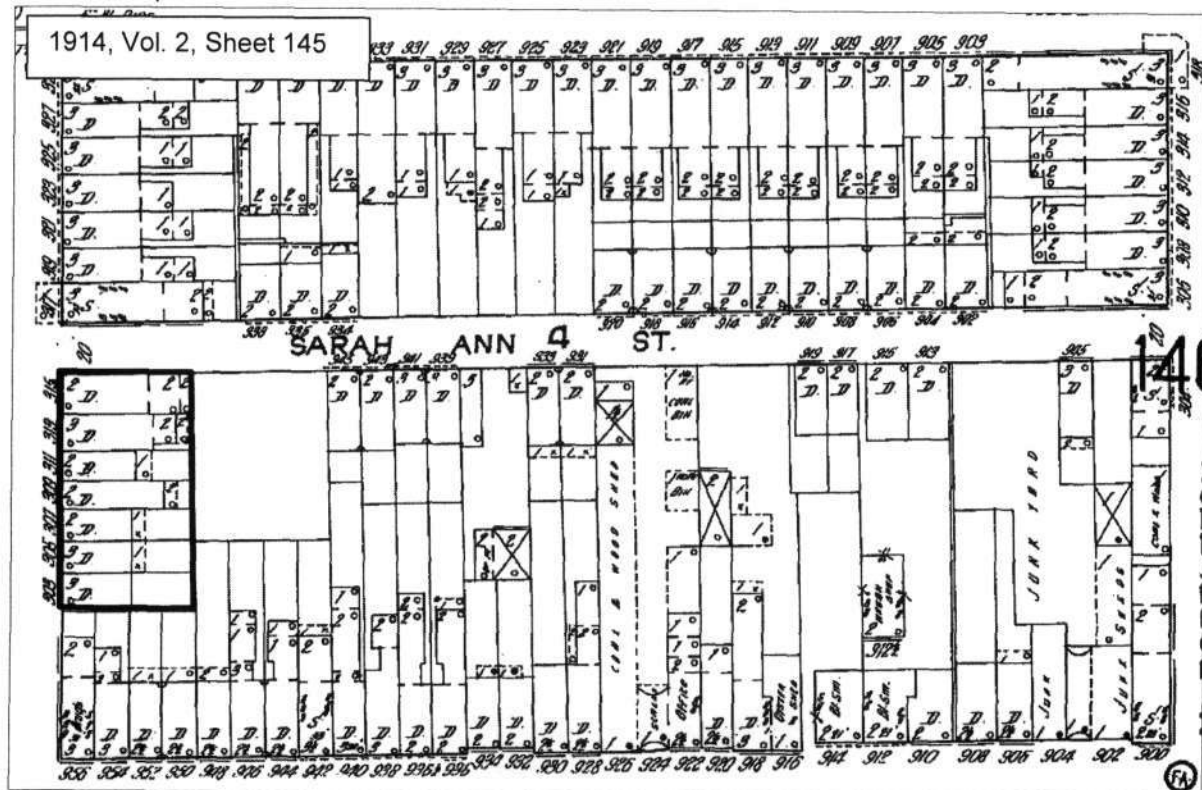

Two story gable houses with high basements and steep wooden stairs. Number 315, a gable with dormer, is perhaps the earliest house in the group. The remnant of a wood clapboard building is visible at the rear of 956 W. Saratoga, one of the very few wood-frame structures in Poppleton.

Environmental context:

Good context; across-street row of larger houses of pleasing style. Street trees are needed to relieve the western facades of summer sun and give scale to the wide street.
